

How to access the system from an iOS device:

Turn on the device's Wi-Fi.

Click on **Settings**, then on **Wi-Fi**:

Click on the **configuration icon**  :

Click on **Auto** and configure the Proxy http, inserting <http://www.luiss.it/httpgw.pac> in the **URL** field:

The screenshot shows the iPhone Wi-Fi settings for the 'eduroam' network. At the top, the status bar shows 'TIM', signal strength, time '15:56', and battery '82%'. Below the network name, there is a 'Join Network' button. The 'IP ADDRESS' section has three options: 'DHCP' (selected), 'BootP', and 'Static'. Below this are fields for 'IP Address', 'Subnet Mask', 'Router', 'DNS', 'Search Domains', and 'Client ID'. The 'HTTP PROXY' section has three options: 'Off', 'Manual', and 'Auto' (selected and highlighted with a red box). Below this is the 'URL' field, which is currently empty and highlighted with a red arrow pointing to it from the left.
